SLIPPERS WITH SOUL

This slipper pattern is extremely versatile. Each slipper size can be matched with pre-made leather suede soles or finished with a hand-knit Herringbone stitch PolarKnit sole. PolarKnit yarn makes a durable sole that will stand up to constant wear and still allow you to throw the whole slipper into the washing machine. You can wear the sides of the slipper up to keep ankles toasty warm or fold them down for added support. Knit on straight needles, this pattern is easy to follow and knits up fast.

FINISHING:

Attaching Knit Sole

With RS of Slipper Top facing up, place on top of knitted sole, with RS of sole facing down. I recommend stretching out the Slipper Top and tacking several safety pins around the edge to make sure everything is spaced accurately. With darning needle and loose yarn tails attached the Slipper Top to the knit sole.

Attaching Suede Leather Sole

Stretch Slipper Top out and tack it to leather sole using several safety pins. Use a strong metal darning needle, sew the Slipper Top to the sole using either blanket stitch, cross stitch, or whip stitch.
